

Cookie Notice - JIRA

Enterprise Jira

Last revised: Mar 2023

What is a cookie?

A cookie is a small text file placed on your device by the websites that you visit. Cookies are then sent back to the website on each subsequent visit, or to another webpage that recognizes that cookie. Cookies are used in order to make the website work, or to work more efficiently, as well as to provide information to the owners of the website. Such information may be used to provide a more personalized and responsive service. Cookies may be either first party cookies set directly by us to your device, or third-party cookies set by a third-party provider on our behalf. Whenever you use this Website, information may be collected through the use of cookies and other similar technologies (e.g., web beacons, tags, scripts, local storage).

Please note that this Cookie Notice is part of our [Privacy Notice](#)

Cookie Categorization

Cookies are usually classified into any one of the following categories:

- “Strictly Necessary” cookies are necessary for the Website to function and cannot be switched off in our systems. They are usually only set in response to actions made by you which amount to a request for services, such as setting your privacy preferences, logging in or filling in forms.
- “Analytics and Performance” cookies allow to track analytics by counting visits and traffic sources to measure and improve the performance of any Website. They may be set by the application team or by third party providers (e.g., Adobe, Akamai, Brightcove, Qualtrics) to know which pages or videos are the most and least popular and see how visitors move around the Website.

Below is the list of the cookies that are used by Jira:

Strictly necessary cookies

Always Active

These cookies are necessary for the website to function and cannot be switched off in our systems. They are usually only set in response to actions made by you which amount to a request for services, such as setting your privacy preferences or filling in forms.

Name	JSESSIONID
Host	jira-eu.deloitte.com
Duration	When Session ends
Type	First Party
Description	The JSESSIONID cookie is created by the application server and used for session tracking purposes. This cookie contains a random string, and the cookie expires at the end of every session or when the browser is closed.

Name	remember my login
Host	jira-eu.deloitte.com
Duration	The maximum time to live of this cookie is 25 days and can be customized as well.
Type	First Party
Description	The 'remember my login' cookie, seraph.rememberme.cookie, is a long-lived HTTP cookie. This cookie can be used to authenticate an unauthenticated session. Jira generates this cookie when the user selects the Remember my login on this computer checkbox on the login page.

Name	atlassian.xsrf.token
Host	jira-eu.deloitte.com
Duration	At the end of every session or when the browser is closed.
Type	First Party
Description	Helps prevent XSRF attacks. Ensures that during a user's session, browser requests sent to a Jira server originated from that Jira server. For more information about XSRF checking by Jira, see Form Token Checking on the Atlassian Developers site.

Name	jira.issue.navigator.type
Host	jira-eu.deloitte.com
Duration	One year from the date it is set or was last updated.
Type	First Party
Description	Tracks which type of search view was last used (i.e. simple or advanced searching).

Name	AJS.conglomerate.cookie
Host	jira-eu.deloitte.com
Duration	At the end of every session or when the browser is closed.
Type	First Party
Description	Tracks which general tabs were last used (e.g. in Jira's plugin manager) or expansion elements were last opened or closed.

Name	UNSUPPORTED_BROWSER_WARNING
Host	jira-eu.deloitte.com
Duration	At the end of every session or when the browser is closed.
Type	First Party
Description	Acknowledges that the user has read a message displayed by Jira indicating that the user's browser is not supported by Jira.

Name	AJS.thisPage
Host	jira-eu.deloitte.com
Duration	At the end of every session or when the browser is closed.
Type	First Party
Description	Indicates that the user's browser does not support local storage. This relates to a mechanism used by Jira to store field information in search views when the user clicks their browser's back button.

How long will cookies remain on my device?

The length of time cookies will stay on your device will depend on whether it is a “persistent” or “session” cookie. A persistent cookie will be stored by a web browser and will remain valid until its set expiration date, unless deleted by you before the expiration date. A session cookie, on the other hand, will expire at the end of your web session, when the web browser is closed.
